

Custom Shaped USB

Amstore has developed an extremely cost effective process for the creation of custom design USB flash drives. This has expanded the possibilities for product and brand managers. For example a battery manufacturer can have a battery shape as the USB, a transport company one of its vehicles, or a drinks manufacturer, its drinks bottle.

What Is A Custom USB?

A USB flash drive that is specifically designed and manufactured in a shape that best demonstrates your brand, product or service.

How Can It Be Used?

They can be provided blank or pre-loaded with relevant information that can help to market your business.

Key Benefits?

USBs deliver long term advertising opportunities. With their higher perceived value and widespread use, clients keep and re-use them. Because it's a USB in a custom shaped for you and you only, it will promote your company and remind people of your product or service time after time.

Casing materials for Custom

Various materials are available depending on the USB design and volume requirements.

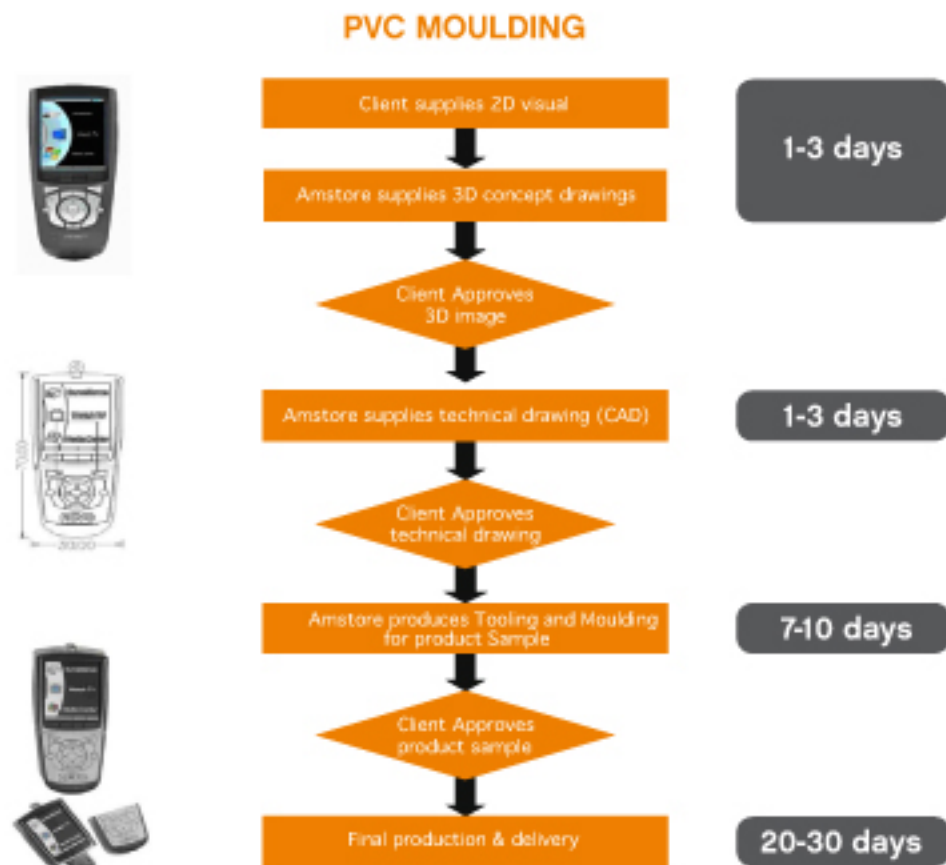

- Silicon*
- ABS plastic*
- PVC
- Mixed Polymer hard plastic
- Epoxy resin (Doming stickers)
- Metal*
- Wood*

* Longer lead time due to tooling requirements

Process & Timings

Amstore can deliver 3D visuals of your prospective project in 24-48 hours. From client approval we then produce product drawings and move to final production.
